

INDY EVO PLUS

Indy Evo Plus is a manually operated descender device with double auto-locking system which is activated both when the lever is released or when is pressed.

DESCRIPTION

For use with static (EN 1891) and dynamic (EN 892) ropes.

The stainless steel cams for long lifetime.

Foldable lever for easier handling.

Certified for two persons while using 11-12 mm ropes.

Double auto-locking system locks both when the lever is released or when is pressed.

Safety gate on the moving side plate allows the rope to be installed easily while the device remains connected to the harness.
